## PROJECT EXPERIENCE

### FRONT-END WEB DEVELOPER (6 MONTHS)

**Project:** 2021 January - Personal Website ([www.kevingamboa.com](http://www.kevingamboa.com))

**Description:** A mobile-responsive personal website showing my work experience and skills as a front-end web developer

**Technical points:**

- HTML
- CSS/SASS - General structure and styling
- Javascript
  - Enabling pop-over effect to display additional content by using jQuery
  - Enabling collapse menu effect when a user clicks elsewhere while the menu is expanded by using jQuery
- Bootstrap5
  - Responsive structures and styling

**Project:** 2020 December - [Guessing Game](#)

**Description:** A game app which requires the player to guess the correct phrases or letters to win the game

**Technical points:**

- HTML
- CSS/SASS - General structure and styling
- JavaScript
  - Functional programming with DOM manipulation for user interactions

**Project:** 2020 December - [Employee Directory](#)

**Description:** A mobile responsive website that displays employee data

**Technical points:**

- HTML
- CSS/SASS
  - CSS Grid for styling main content
- JavaScript
  - Used fetch API to populate employee data
  - Used template literals to display content with data

**Project:** 2020 December - [Interactive Web App Dashboard](#)

**Description:** Used javascript plugins for displaying interactive charts and data

**Technical points:**

- HTML
- CSS/SASS
  - CSS Grid for styling
- Javascript
  - Used chart.js plugins to display interactive charts

**Project:** 2020 November - [Registration Form](#)

**Description:** A mobile-first responsive site built with using media-queries, with different HTML form input types displayed

**Technical points:**

- HTML
- CSS
  - General structure and styling
  - media-queries for styling through different view ports/devices

**Project:** 2020 November - [Interactive Photo Gallery](#)

**Description:** An interactive photo gallery that allows user to zoom in and out of each photo and the ability to navigate search for a photo

**Technical points:**

- HTML
- CSS
  - CSS Grid for styling main content
- Javascript
  - Used baggueteBox.js's lightbox plugin for the ability to zoom in and out of photos, with the ability to navigate through each photo
  - Used searchFilter.js for searching through photos
